MUHAMMAD USMAN QURESHI

AI ENGINEER | ML INFERENCE, LLM APPLICATIONS & AUTOMATION

Islamabad, Pakistan • +92 319 2304660 • ushakurosaki@gmail.com • github.com/ushalabs

PROFILE

Final-year Software Engineering student building AI applications and workflow automations with ML inference, LLM APIs, backend services and human oversight. Developed meeting transcription and action-item workflows, an XGBoost-based intrusion detection system, and a Telegram sales assistant in testing. Also published a functioning Android app on Google Play. Seeking remote AI engineering and automation roles.

TECHNICAL SKILLS

Languages & tools Python, TypeScript, JavaScript, SQL, Git/GitHub, Docker
Machine learning XGBoost, feature engineering, Scapy/Npcap, model serving, inference
AI & automation Gemini APIs, Groq Whisper, n8n, webhook orchestration, human-in-the-loop
Backend & data FastAPI, REST APIs, WebSockets, PostgreSQL, Supabase, Firebase/Firestore

SELECTED PROJECTS

MEETINGMINUTES AI | AI Meeting Intelligence Workspace

TESTED & VERIFIED • FastAPI · React · Groq Whisper · Gemini · Supabase • GitHub

- Built a full-stack meeting workspace that transcribes uploaded recordings via Groq Whisper and generates summaries, decisions and action items with Gemini.
- Persisted meeting records in Supabase/PostgreSQL and integrated review, editing, search and human-approved email recaps through Resend.

SENTINEL | ML Network Intrusion Detection & Automation

VALIDATED PROJECT • XGBoost · FastAPI · PostgreSQL · n8n • GitHub

- Built an ML detection pipeline with Scapy/Npcap collection, 77-feature flow extraction, XGBoost inference and PostgreSQL-backed live analytics.
- Connected attack detection to n8n, AbuseIPDB and Gemini enrichment with an analyst approval queue and WebSocket dashboard.

AI SALES AGENT | Telegram Business Sales Automation

DEVELOPMENT & TESTING • n8n · Gemini · PostgreSQL · Telegram API • GitHub

- Building a Telegram Business DM assistant that uses Gemini and PostgreSQL product data to answer catalog, stock, pricing and shipping questions.
- Added n8n workflows for owner on/off controls, per-chat human takeover and message deduplication; end-to-end live testing ongoing.

VELORA | Published Real-Time Social Application

LIVE ON GOOGLE PLAY • Expo / React Native · Firebase · Cloudinary • Google Play / GitHub

- Shipped a working Android messaging and social platform to Google Play with group chat, multimedia sharing, posts, stories and push notifications.
- Integrated Firebase Auth, Firestore, Cloudinary and Firebase Cloud Messaging with access controls and production distribution.

EDUCATION & CERTIFICATION

B.S. Software Engineering | Riphah International University, Islamabad | Jun 2027
Google AI Professional Certificate | Google | Verify credential
