MUHAMMAD USMAN QURESHI

FULL-STACK SOFTWARE ENGINEER | BACKEND & APPLICATION DEVELOPMENT

Islamabad, Pakistan • +92 319 2304660 • ushakurosaki@gmail.com • github.com/ushalabs

PROFILE

Final-year Software Engineering student building and shipping mobile, web and native desktop software. Published a real-time Android social app on Google Play, packaged a Windows downloader, and developed a FastAPI-backed incident platform. Experienced in application architecture, databases, API integration, testing and iterative debugging. Seeking remote full-stack or backend engineering roles.

TECHNICAL SKILLS

Languages & tools Python, C++20, TypeScript, JavaScript, SQL, Git/GitHub, Docker, CMake
Frontend & mobile React, Next.js, React Native, Expo, Qt 6, Tailwind CSS
Backend & APIs FastAPI, REST APIs, WebSockets, Firebase Authentication, SQLAlchemy
Data & infrastructure PostgreSQL, Firebase/Firestore, SQLite, Redis, Prometheus, Grafana, libcurl

SELECTED PROJECTS

VELORA | Real-Time Social & Messaging App

LIVE ON GOOGLE PLAY • Expo / React Native · Firebase · Cloudinary • Google Play / GitHub

- Shipped an Android social app with real-time 1:1/group chat, multimedia and voice messages, friends, profiles, posts, stories and notifications.
- Integrated Firebase Authentication/Firestore, Cloudinary uploads and Firebase Cloud Messaging; implemented user-scoped security rules.

AEGISOPS | AI-Assisted Incident Operations Platform

LOCALLY VALIDATED • Next.js · FastAPI · PostgreSQL · Docker • GitHub

- Built a Next.js operator dashboard and FastAPI/PostgreSQL backend for incident tracking, investigation history, human approvals and recovery verification.
- Integrated Docker test services, LangGraph/pgvector investigation workflows and Prometheus/Grafana observability in a locally validated system.

DOWNSHIFT | Native Windows Download Manager

WINDOWS v1.0.0 PACKAGED • C++20 · Qt 6 · libcurl · SQLite • GitHub

- Developed a native desktop application for segmented HTTP/HTTPS downloads, torrent/magnet transfers, video workflows and persistent download history.
- Implemented pause/resume, Chrome Manifest V3 and Native Messaging integration; built and validated an NSIS Windows installer.

SOLVANTA | Solar Energy Digital Twin & Simulation

DEVELOPMENT & TESTING • React Native · Expo · FastAPI · PostgreSQL • GitHub

- Building an Android-first energy planning app with building/appliance profiles, rooftop layouts, and solar, battery and outage scenario simulations.
- Implemented scenario comparisons, load scheduling, plan approvals and replay workflows; current integrated build remains in testing.

EDUCATION & CERTIFICATION

B.S. Software Engineering | Riphah International University, Islamabad | Jun 2027
Google AI Professional Certificate | Google | Verify credential
